

To whom it may concern;

K-LOVE informs me of local concerts and events. I also am informed from the daily news component on local issues. I feel it gives me a chance for meditation and daily devotion so that I can better serve those at work, school and throughout my day.

I feel the effects would be catastrophic on the peace and prosperity of my community. A greater increase of violent crime, teenage pregnancy and malicious acts would erupt from a religious void.

In short without the compass and guidance that Christian radio offers my community we would be like a ship upon a sea without a sail being barraged by the wind and waves without direction or recourse.

After reading the previous paragraph, need I speak on the benefit of public interest? It gives people such as myself music to complement my daily devotion. It inspires and encourages people to reach to higher standards. It lifts them up when they are in despair. There will be less depression and heart-ache. Through the outreach program that K-LOVE runs people who are struggling from Mental illness or worries. K-LOVE also donates large amounts of money and other services to help food/homeless shelters. But perhaps the greatest service of K-LOVE is the courage and inspiration it invokes amongst its listeners. It is a difference that is quite visible and real. I also feel that marriages will be strengthened. There will be a greater spirit of love, unity and service on behalf of those in need.

Please consider the lives that will be influenced by the forthcoming decision. I am but one of many whose lives have been brightened and transformed through the ministry and music of this facility.

Sincerely,

Cory
